

Project 4 : Road Accidents Analysis

India has the highest number of road fatalities in the world. In 2016, the latest year for which global figures are available, India accounted for more than a third of global road accident deaths. The World Health Organization says such deaths are under-reported and estimated that in 2016, the figure for India was likely twice as big as that reported by the government. In this project, Perform a detailed statistical data analysis on Road Accidents of India over a period of 5-7 years using various Python Libraries.
